Foreign Agricultural Trade of the United States

May/June 1986

IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION

* Foreign Agricultural Trade of the United States is published six times a
year with two supplements. Subscription prices are \$26 a year domestic
and \$32.50 foreign (prices subject to change). Send check or money order
payable to "Superintendent of Documents" to Superintendent of Documents,
U.S. Government Printing Office, Washington, DC 20402. For faster
service, call (202) 783-3238 and charge your subscription to your VISA,
MasterCard, Choice, or GPO Deposit Account.

IS IT TIME TO RENEW?

* Your subscription to this publication may be due to expire soon. If so,
you will get a renewal notice in the mail from GPO about 90 days ahead of
time. Only one notice is sent. You must return it promptly to ensure
uninterrupted service. If you have misplaced your renewal notice, use the
form on the back of this report. Be sure to attach mailing label.

Prepared by the International Economic Indicators Branch, International Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were C. Edward Overton, Thomas A. Warden, and Thomasine B. McCall. Mary L. Fant provided statistical support. Judith Placer and Janet Sayre provided word processing and table formatting support. Editorial support was provided by Linda L. Hatcher, Research Information Branch, Economics Management Staff. Data processing support was provided by Sharlan Starr and William Meiller, International Economic System Branch, Data Services Center, and Penni Korb, International Economic Indicators Branch.

Digest

U.S. Agricultural Exports Drop 19 Percent (see p. 2). U.S. agricultural exports totaled \$17.3 billion in the first 7 months of fiscal year (FY) 1986, 19 percent below the same period of 1985. Exports for October 1985-April 1986 dropped from year-earlier levels because foreign production increased and importers delayed purchases of grains in anticipation of lower prices. Export volume dropped 14.5 million tons to 72.3 million tons, a 17-percent decline from the same period in 1985. In the next several months, grain shipments are expected to benefit from reduced loan rates provided in the 1985 Food Security Act.

U.S. Farm Imports Rise With Consumer Demand (see p. 71). Agricultural imports in the first 7 months advanced 4 percent over the same 1985 period to \$12.3 billion. Most of the increase arose from larger inflows of noncompetitive products, particularly coffee. Sugar imports continued to decline, dropping \$196 million to \$396 million. This decline, stemming from lower import quotas and increased corn sweetener use, is expected to reduce sugar imports further in FY 1986.

Dollar Slide Abates (see p. 115). The decline of the U.S. dollar, which began in February 1985, abated in March and April 1986. Japanese, German, and U.S. central banks hope to stabilize the dollar before it further depreciates. The U.S. Treasury hopes the lower dollar against the yen will help correct the large U.S. trade deficit and prevent Congress from writing protectionist trade legislation.

FY 1985 Shipments Under Export Credit Programs Drop (see p. 119). U.S. agricultural exports under credit guarantees of the Commodity Credit Corporation fell more than 25 percent in FY 1985 to about \$2.8 billion from \$3.8 billion in FY 1984. The decline reflected the strong dollar, favorable world harvests, increased foreign competition, and suspension of the Blended Credit Program. Chief commodities exported were wheat, corn, and cotton. Top recipients were Korea, Brazil, and Iraq.

U.S.-Soviet Trade Heavily Favors United States (see p. 123). U.S.-Soviet trade remains heavily tilted in favor of the United States, mainly due to Soviet purchases of U.S. grain. In 1985, the USSR was the second largest U.S. export market for grain. Although the Soviet Union is likely to remain a major purchaser of U.S. grain in 1986, its grain imports are expected to decline because of an estimated 20-million-ton increase in 1985 Soviet grain output.

U.S. Agricultural Exports Drop 19 Percent

U.S. agricultural exports fell \$4.1 billion in value to \$17.3 billion in the first 7 months of fiscal year (FY) 1986 (Oct. 1985-Apr. 1986), 19 percent below those of the same period a year earlier. Much of the decline stemmed from lower shipments of grains, which are expected to benefit the most from the loan-rate reduction provisions of the 1985 Food Security Act. However, U.S. grain and feed exports fell \$3 billion to \$6.1 billion as importers delayed purchases in anticipation of lower prices, thereby aggravating the impact of increased foreign production. Cotton exports declined \$1 billion for similar reasons.

Export volume dropped 14.5 million tons to 72.3 million tons, a 17-percent decline from those of the same period in FY 1985. Coarse grain exports, accounting for most of the decline, dropped 12.3 million tons; wheat exports, 5.2 million tons, and cotton exports, 646,000 tons (a 68-percent decline). However, soybean and soybean meal exports rose 3.4 million tons due to lower competitor production. Export volume also increased for wheat flour, animal products, and feeds and fodders other than oilcake (mostly corn gluten).

Coarse Grain Exports Fall 31 Percent

U.S. coarse grain exports fell 31 percent in volume in the 7-month period to 26.8 million tons and 41 percent in value to \$2.9 billion compared with those of the same period in FY 1985. Production of competing products in some important exporters and importers climbed last year, diminishing U.S. export prospects in FY 1986. In addition to a record-high Argentine corn crop, the world market had to absorb large supplies of Canadian feed wheat and a near-record Australian barley crop that immediately followed Australia's record-large harvest of the previous year.

In the Soviet Union, excellent nongrain feed production and an improved grain harvest cut what had been record-high import needs, and U.S. sales there fell 7 million tons. Coarse grain shipments to Sub-Saharan Africa fell 1.5 million tons as the production shortfalls which had sustained U.S. exports there in FY 1984 and FY 1985 eased. A 40-percent jump in Venezuela's coarse grain production and Iraq's improved barley crop cut U.S. sales to those countries 523,000 tons and 628,000 tons, respectively.

Argentine Competition a Factor

Argentina responded to lower Soviet purchases and its own record-high corn crop by aggressively marketing in some traditionally U.S.-dominated markets. U.S. coarse grain exports to Japan fell 714,000 tons due in part to increased Argentine shipments. Unprecedented Argentine sales to Korea reduced the positive effect of lower Chinese exports, and Mexico's purchases from Argentina also displaced U.S. sales.

U.S. coarse grain exports to Mexico declined 1.1 million tons as a dramatic drop in petroleum revenues forced the government to limit imports and encourage wheat feeding. In Western Europe, industrial demand for U.S. corn fell as larger

quantities of high-quality French corn became available. Increased wheat gluten production in the European Community (EC) also meant increased production of starch, further reducing the need for U.S. corn. U.S. coarse grain exports to Western Europe fell 1.2 million tons as a result.

U.S. coarse grain exports to Brazil, the only country with increased U.S. corn purchases, rose nearly 1 million tons to 1.1 million tons. The same drought which cut soybean and coffee production in Brazil also reduced corn crop yields.

Wheat Exports 34 Percent Lower

U.S. wheat exports fell 5.2 million tons to 13.5 million tons as importers postponed purchases in anticipation of lower U.S. prices after May 1986. In the first 7 months of FY 1985, Brazil and the USSR imported about 5 million tons of U.S. wheat combined. In 1986, these former top customers bought 284,000 tons. Better harvests played some role in this reduction--Brazil's crop doubled--but the postponements that reduced world trade were also important. The value of U.S. wheat exports fell nearly \$1 billion to \$1.9 billion as lower prices compounded the impact of smaller tonnage.

U.S. sales to the Middle East, Japan, and Korea all exceeded 1 million tons in the 7-month period, changing little from the same period the previous year. Similarly, wheat shipments to South Asia in FY 1986 were close to the 1.2 million tons of the year before; larger shipments to Pakistan offset sharply reduced purchases by Bangladesh.

Wheat exports to Sub-Saharan Africa fell, due to smaller shipments to Nigeria. Wheat sales to Nigeria fell from 1.1 million tons to 362,000 tons as falling petroleum export revenues forced the Nigerian Government to reassess its import requirements and delay issuing import licenses.

Export Enhancement Program Boosts Some Sales

Wheat exports to North Africa rose 1.1 million tons largely because of shipments to Egypt and Algeria through the Export Enhancement Program (EEP). EEP initiatives also resulted in higher shipments to Morocco, Turkey, and the Philippines.

The EEP also helped boost wheat flour exports 28 percent. EEP initiatives benefited shipments to Egypt, Yemen, Iraq, Zaire, and the Philippines. Shipments to Ethiopia, where food shortages persist, rose as well. However, lower prices left wheat flour's export value little changed at \$122 million.

Exports of feeds and fodders (mostly corn gluten) increased as shipments to Western Europe rose 707,000 tons to 3.6 million tons. Export value for feeds and fodders rose \$104 million to \$722 million due to higher sales to Europe. Except for this and an \$11 million increase in bulgur wheat, export value fell for all other grains and feeds.

Oilseeds and Products Outperform Grains

The export value of oilseeds and products contrasted markedly with the 33-percent decline in grain export value by falling 1 percent to \$4.6 billion. Increased volume of soybean and soybean meal exports helped offset the impact of lower sales of sunflowerseed and vegetable oil, and the average price of soybean meal exports rose, also helping sustain value.

The export volume of U.S. soybeans and soybean meal rose 3.4 million tons to 19.4 million tons. Brazil, which had made sizable gains into the United States' share of the world oilseed market in 1985, suffered a 29-percent reduction in its subsequent soybean harvest because of drought. World soymeal consumption stagnated, but the rebounding market share enabled U.S. soybean exports to increase 19 percent to 15.7 million tons and soybean meal exports 32 percent to 3.7 million tons.

U.S. vegetable oil exports did not fare as well, however. Record-high palm oil production in Malaysia reduced U.S. export volume and sent prices tumbling. The volume of U.S. soybean oil exports fell 43 percent because of smaller shipments to India, the Soviet Union, and most Latin American destinations.

Livestock Product Exports Up

Exports of U.S. animals and animal products rose 4 percent in value to \$2.6 billion in the first 7 months of FY 1986, largely because of high average export prices for cattle hides and live animals and increased meat export volume. A second year of decreased U.S. cow slaughter lowered cattle hide supplies and slightly reduced export volume, but the lower supplies (the United States is the world's largest supplier to world trade), continued strong demand overseas, and a weaker U.S. dollar combined to increase prices. As a result, the value of U.S. cattle hide exports rose 5 percent to \$631 million.

Similarly, the value of live animal exports rose to \$217 million, despite a 325,000-head drop in animals exported. Sheep accounted for virtually all the decline as the weaker Mexican peso and increased interest in rebuilding Texan flocks drove exports down. Horse exports rose in number and unit value, and cattle export unit values rose as well.

Horticultural Exports Increase

The value of U.S. horticultural exports climbed 2 percent to \$1.74 billion. The volume of fruit juice exports fell and combined with lower prices to nearly offset gains in other fruit, nut, and vegetable exports. The volume of nonjuice fruit exports fell, but strong U.S. consumer demand increased retail and export prices, pushing fruit export value up \$16 million to \$591 million.

U.S. fresh vegetable prices also increased in the 7-month period of FY 1986 because of reduced U.S. acreage and production in the West. Higher prices and a weaker Canadian dollar helped reduce fresh vegetable exports \$9.5 million. Canada increasingly has substituted its own production for imports from the United States, reducing U.S. sales to the largest U.S. fresh vegetable customer.

However, larger pulse exports more than offset lower fresh vegetable exports. Global exportable supplies of inexpensive pulses were unusually short in FY 1986, following a poor Turkish crop. Thailand also suffered a short crop, and prices for lentils soared. U.S. pulse exports rose to Mexico, Brazil, Egypt, and Algeria. The value of U.S. pulse exports increased \$14 million. (Stephen MacDonald, International Economic Indicators Branch)

Fruits - canned ex juice	37,728	33,893	-10	4,987	6,028
Fruits - froz ex juice	6,907	6,533	-5	955	885

TABLE 4--U.S. AGRICULTURAL EXPORTS: VALUE (1,000 DOL) of selected commodities,
October-April 1984/85 and 1985/86, and April 1985 and 1986--continued

Commodity	October-April			April	
	1984/85	1985/86	Percentage change	1985	1986
Other fruits - prep or pres	12,840	9,374	-27	1,541	1,564
Fruit juices incl froz	112,301	87,659	-22	17,790	13,849
Orange juice	66,695	42,454	-36	9,330	4,861
Other fruit juices	45,606	45,205	-1	8,461	8,888
Nuts & prep	432,810	455,789	5	47,832	59,684
Almonds (shelled basis)	228,973	243,933	7	28,784	39,244
Peanuts, shelled or prep	117,601	122,123	4	12,844	14,667
Walnuts, shelled/unshelled	58,625	60,991	4	1,809	1,857
Pecans, shelled or unshelled	2,104	2,241	6	213	450
Other nuts, shelled or prep	25,506	26,501	4	4,082	3,365
Vegetables & prep	586,862	608,518	4	79,020	82,806
Vegetables - fr	145,986	136,507	-6	24,722	25,314
Celery - fresh	9,215	10,449	13	1,484	2,085
Lettuce - fresh	24,804	25,658	3	2,877	4,559
Potatoes - fresh	6,079	4,139	-32	1,439	1,275
Tomatoes - fresh	20,359	23,145	14	4,152	2,701
Other fresh vegetables	85,529	73,116	-15	14,759	14,694
Vegetables - froz	54,111	62,997	16	6,676	8,896
Potatoes - frozen	25,971	31,994	23	3,459	4,613
Other frozen vegetables	28,140	31,003	10	3,217	4,284
Vegetables - canned	60,343	60,083	0	9,640	10,203
Pulses	124,800	138,735	11	9,375	8,019
Dried beans	84,851	90,795	7	5,269	6,035
Dried peas	29,726	28,417	-4	2,382	1,719
Dried lentils	10,223	19,523	91	1,725	265
Hops, incl hop ext	37,548	33,286	-11	2,105	2,863
Other veg - prep or pres	164,075	176,910	8	26,502	27,511
Oilseeds & prods	4,647,478	4,596,803	-1	535,306	662,082
Oilcake & meal	562,693	756,980	35	65,404	113,704
Soybean meal	549,983	745,779	36	64,508	111,683
Other oilcake & meal	12,708	11,200	-12	896	2,021

-- Not applicable.

U.S. Farm Imports Rise With Consumer Demand

U.S. agricultural imports rose 4 percent to \$12.3 billion in the first 7 months of fiscal year (FY) 1986 (Oct. 1985-Apr. 1986) from \$11.8 billion in the same months of FY 1985. Most of the increase came from demand for noncompetitive imports (commodities not interchangeable with those produced in the United States), particularly coffee. Coffee import volume reached 741,000 tons, valued at \$2.5 billion, up 35 percent from a year earlier, mainly because of higher prices. Raw sugar imports continued to decline, dropping \$196 million to \$396 million. This decline, along with import quotas, duties, fees, and increased corn sweetener use, is expected to reduce sugar imports again in FY 1986. Ample supplies of cocoa, natural rubber, live hogs, beef, coconut oil, tea, and palm kernel oil reduced imports of those products.

Agricultural imports during April rose to \$1.8 billion in value compared with \$1.7 billion in April 1985 but fell 10 percent from the \$2 billion imported in January 1986. Competitive imports (commodities interchangeable with commodities produced in the United States) in the first 7 months totaled \$7.7 billion, down marginally from those of the first 7 months of FY 1985, while noncompetitive items reached \$4.6 billion. U.S. farm product imports from developing nations accounted for 59 percent of U.S. agricultural imports and totaled \$7.3 billion compared with \$4.7 billion from developed nations.

Imports from Brazil, the single largest supplier, declined 14 percent in value during the 7-month period, stemming from lower values for orange juice and coffee. Imports from Canada, the second largest source of agricultural imports in this period, declined 4 percent in value, primarily because of smaller shipments of live hogs and cattle. Agricultural imports from Mexico gained 37 percent in value, mainly because of higher values for coffee and live cattle. The market shares of Colombia, Australia, The Netherlands, West Germany, and France also gained.

Noncompetitive Imports Continue To Rise

Noncompetitive import values accelerated 15 percent to \$4.6 billion. Value increases for coffee, spices, and essential oils offset declines for cocoa and products, natural rubber, and tea. Fresh banana imports, valued at \$427 million, remained virtually unchanged from the same 7 months in FY 1985.

Values for natural rubber imports fell 12 percent to \$384 million during the first 7 months because of lower prices, as volume gained 4 percent to 515,000 tons. Import unit prices plunged 16 percent to \$745 a ton. Indonesia supplied about 57 percent of the rubber, and Malaysia supplied nearly all of the rest.

U.S. imports of cocoa and products reached \$736 million, down 9 percent from those of the 7-month period in FY 1985. Volume also declined 9 percent to 300,000 tons as import unit prices increased 5 percent to \$1.11 a pound. The value and volume decline was due mainly to adequate U.S. inventories and reduced cocoa bean imports from the Ivory Coast. Import values for cocoa products, especially for cocoa powder, cake, butter, and sweetened chocolate, remained about the same as those of a year earlier. The New York cocoa futures prices averaged \$1.02 a pound in April 1985, but increased world supplies pulled prices back to 84.9 cents a pound in April 1986.

Competitive Imports Down Marginally

Higher competitive import values for major items, such as vegetables, fruits, dairy products, tobacco, wine, malt beverages, live cattle, grains, feeds, cashew nuts, palm oil, seeds, and fresh cut flowers, did not offset declines for raw sugar, orange juice, beef, coconut oil, live hogs, and palm kernel oil. Competitive imports during the first 7 months of FY 1986 totaled \$7.7 billion, down marginally from those of the same period last year. Beef imports declined slightly in value to \$690 million as a 6-percent rise in volume of 372,000 tons offset a 5-percent decline in import unit prices. Increased export availabilities in Australia, rising consumer demand for manufacturing-grade beef, and lower U.S. beef output are expected to further strengthen beef imports in the second half of FY 1986. Australia shipped 43 percent of the volume of U.S. beef imports, with New Zealand, Canada, and Argentina supplying most of the rest.

Because of higher prices, pork imports in the 7-month period totaled 234,000 tons, down 3 percent from those of a year earlier. Cumulative pork imports reached \$508 million compared with \$505 million a year earlier. U.S. imports from Canada increased 17,000 tons, while those from Denmark declined 19,000 tons. The Canadian dollar slipped in recent months relative to the U.S. dollar, making Canadian pork cheaper in U.S. currency. The Danish krone, however, strengthened, thus causing the price of Danish pork to rise in the United States.

Cheese imports, at \$230 million, gained 7 percent during the first 7 months from the year-earlier value, while volume, at 81,000 tons, inched up 2 percent from a year earlier. Import unit prices for cheese averaged \$1.29 a pound in the first 7 months of FY 1986 compared with \$1.24 a pound the previous 7 months. Western Europe and New Zealand shipped most of the cheese.

Because of relaxed export restrictions, strong shipments from Mexico pushed up dutiable cattle entries in the first 7 months of FY 1986 to 839,000 head (\$276 million) from 375,000 head (\$165 million) in the same period of FY 1985. Canada, however, shipped 180,000 head to U.S. markets compared with 260,000 head during the same months in 1985. Live hogs from Canada also dropped sharply to 322,000 head from almost 1 million head during the first 7 months of FY 1985. Hog shipments to U.S. processing plants fell due to more U.S. spring hog marketings, larger supplies of frozen pork, consumer switching to lower priced beef, and countervailing duties (Canadian \$4.39 per hundredweight).

Vegetable imports increased through April, partly because of higher prices for canned and frozen vegetables. Import values of vegetables and preparations gained almost 2 percent to \$919 million, while volume dropped 7 percent to 1.3 million tons because of reduced shipments of fresh Mexican vegetables. Tomatoes, cucumbers, onions, peppers, squash, and eggplant are the principal vegetables imported from Mexico. Lower prices pushed the value of Mexico's fresh vegetables and products down to \$372 million compared with \$411 million in the 7-month period of FY 1985. Canned mushrooms gained 10 percent in value to \$72 million, with Taiwan and China providing most of the canned mushrooms.

Vegetable oil imports fell 11 percent in value to \$356 million due to reduced imports of coconut and palm kernel oils. Coconut oil value declined 21 percent to \$140 million. Because of falling prices, the volume rose sharply to more than 322,000 tons, with import unit prices averaging \$436 a ton compared with \$868 a ton for the first 7 months of FY 1985. The Philippines supplied most of the coconut oil.

Larger domestic supplies of oranges and canned fruits reduced fruit and preparation imports 14 percent in value to \$949 million. Imports of concentrated orange juice from Brazil declined sharply in value, but imports of fresh grapes from Chile and canned pineapples from the Philippines and Thailand exceeded those of the first 7 months in FY 1985. Total orange juice volume declined 30 percent to 301 million gallons valued at \$292 million. Import unit prices for orange juice dropped 21 percent. In contrast, strong demand and lower supplies for apples, pears, and other varieties spurred fruit import values to \$515 million compared with \$453 million a year earlier. Fruit imports are expected to strengthen through late spring and summer because of smaller supplies of red delicious apples from Washington and reduced supplies of late spring and summer fruit from recent cold weather in the Southeast and California.

Wine and malt beverage imports increased to \$990 million in the first 7 months of FY 1986 because of higher prices. However, volume declined 5 percent as import unit prices gained 21 percent. France and Italy are the major suppliers of wine, with The Netherlands, West Germany, and Canada providing most of the malt beverages.

Imports of grains and feeds in the first 7 months in FY 1986 increased 10 percent in value to \$386 million, dominated by larger bakery product purchases at sharply higher prices. Biscuit and wafer entries rose from 60,000 tons the first 7 months in FY 1985 to nearly 76,000 tons in this same period in FY 1986. Value increased 32 percent to \$147 million, because of higher prices. Western Europe and Canada supplied most of the biscuits and wafers.

Values increased for unmanufactured tobacco because of stronger demand for filler leaf. Cumulative tobacco imports totaled \$356 million compared with \$315 million imported for the comparable period last year. Other competitive import values, such as fresh cut flowers, palm oil, furskins, wool, and seeds, also gained. (Charles E. Goode, International Economic Indicators Branch)

Dollar Slide Abates

The decline of the U.S. dollar, which began in February 1985, abated in March and April 1986. Japanese, German, and U.S. central banks hope to stabilize the dollar before it further depreciates. The U.S. Treasury hopes the lower dollar against the yen will help correct the large U.S. trade deficit and prevent Congress from writing protectionist trade legislation.

Dollar Intervention and Lower Interest Rates

The September policy of five major industrial countries (G-5) to intervene together to balance major currency rates renewed impetus in the decline of the U.S. dollar, which began in February 1985. An announcement in January 1986 by the G-5 (United States, United Kingdom, Germany, France, and Japan) broadened this intervention to encompass concerted reductions in major world interest rates.

The prospects for lower inflation triggered by plummeting world oil prices allowed G-5 central banks to coordinate interest rate reductions in early March and mid-April, leaving discount rates at 3.5 percent in Germany and Japan, and 6.5 percent in the United States by the end of April.

Trade Deficit and the Dollar

The yen's rapid appreciation in late April to 160 yen has topped several postwar highs against the dollar. These records have led the Japanese central bank and those in Germany and the United States that are worried about inflationary effects to seek to stabilize the U.S. dollar before proceeding with further depreciation.

However, protectionist trade legislation in Congress concerning the \$150 billion trade deficit is prompting the U.S. Treasury to seek to help correct this deficit with the lower dollar exchange rate.

Tokyo Economic Summit

The heads of state and government from the United States, Japan, West Germany, France, the United Kingdom, Italy, and Canada (the G-7 countries) and the Commissioner of the European Communities met in Tokyo, Japan, May 2-6, for their annual summit conference.

They announced measures to improve the operation of world currency markets by collectively reviewing major economic indicators and attempting to resolve problems arising from individual policy differences. Such indicators will include GNP growth rates, inflation rates, unemployment rates, fiscal deficit ratios, current account and trade balances, monetary growth rates, reserves, and exchange rates. (Edward C. Wilson, International Aggregate Analysis Branch)

FY 1985 Shipments Under Export Credit Programs Drop

U.S. agricultural exports under the Commodity Credit Corporation (CCC) export credit promotion programs fell more than 25 percent in fiscal year (FY) 1985 (Oct. 1984 - Sept. 1985) to about \$2.8 billion from \$3.8 billion in FY 1984. In FY 1985, shipments were made under three credit programs--the Export Credit Guarantee Program (GSM-102), the Export Credit Sales Program (GSM-5), and the Blended Credit Program. The decline reflected the strong dollar, favorable world harvests, increased foreign competition, and suspension of the Blended Credit Program.

The GSM-102 program guaranteed repayment of most of the private credit extended in the implementation of an export sale and a portion of the interest. The GSM-5 program provided direct credit to finance agricultural exports. The Blended Credit Program combined elements of both of these programs by directly providing about 15-20 percent of the credit and guaranteeing repayment of most of the remaining credit involved in the sale.

Exports under GSM-102 dropped \$530.4 million to about \$2.7 billion in FY 1985, the largest decline in the 5-year history of the program. Exports under GSM-5 rose \$14.4 million to \$52 million. The CCC suspended the Blended Credit Program in February 1985, and exports of \$51.5 million in FY 1985 were carryover shipments from sales concluded in FY 1984.

The GSM-102 program accounted for more than 95 percent of the exports under the three programs in FY 1985. Wheat made up more than 40 percent of the value, followed by corn and cotton at about 15 percent each. Brazil, Korea, and Iraq received most of the wheat in FY 1985, with Brazil accounting for about 40 percent of the total. Portugal, Egypt, and Mexico took most of the corn, with Portugal receiving 50 percent of the total. Korea accounted for almost 75 percent of cotton exports under the program. In FY 1984, wheat made up slightly less than 40 percent of the program, going chiefly to Brazil and Iraq. Corn followed at 20 percent with Portugal and Mexico being top recipients. The third largest commodity was sorghum, accounting for 10 percent of the program. Mexico received most of it.

Export volume of most of the major commodities fell, except for that of soybean meal, which almost doubled, and of cotton, which rose more than 40 percent. Corn and rice exports dropped almost 33 percent from FY 1984 levels, and wheat shipments fell 5 percent.

Top recipients in the program were Korea, Brazil, and Iraq, accounting for almost 50 percent of the total value. Korea purchased mostly cotton and wheat; Brazil, exclusively wheat; and Iraq, mostly wheat, corn, and barley. Export value to almost all major recipients fell from FY 1984 levels, except to Brazil, where imports under the program rose by more than 55 percent, and to Egypt, where imports rose more than sixfold. Sales to Korea were only slightly below FY 1984's level, but sales to Iraq fell 15 percent, to Portugal more than 33 percent, and to Mexico 75 percent. Mexico, Korea, and Iraq were top recipients in FY 1984.

Two countries received \$52 million worth of commodities under the GSM-5 program in FY 1985. Turkey took wheat, barley, and soybeans worth \$47.5 million, and Bangladesh imported wheat worth \$4.4 million. FY 1984 exports to these countries totaled \$37.6 million, with \$27.4 million in wheat, corn, and barley to Turkey, and \$10.2 million in wheat to Bangladesh.

Exports in FY 1985 under the Blended Credit Program reached \$51.5 million, consisting solely of wheat to Tunisia and Egypt. These exports represented carryover shipments from sales made in FY 1984. The composition of the \$560 million in commodities shipped in FY 1984 were much more diverse.

In FY 1986, the CCC is authorized to guarantee repayment of about \$4.8 billion in private credits needed to facilitate agricultural export sales, slightly less than the authorized level in FY 1985 because of Gramm-Rudman provisions. No GSM-5 or Blended Credit Programs have been announced for FY 1986. (Mark E. Smith, International Aggregate Analysis Branch, and Fannye G. Lockley, International Economic Indicators Branch)

Smaller U.S. Agricultural Trade Surplus Recorded

The U.S. agricultural trade surplus with the USSR fell more than 33 percent in 1985, primarily because of a reduction of 16 percent in grain prices and 22 percent in the volume of grain sold to the Soviets. In comparison, the overall U.S. agricultural trade balance declined more than 50 percent, its lowest level since 1972. Despite reduced Soviet purchases of U.S. grain, the USSR remained the second most important market for U.S. grains.

The U.S. trade surplus would likely have been larger had not the Soviets refused to meet their wheat purchase commitment for the first time in the 9 years of U.S.-USSR grain agreements. Although the current agreement obligates the Soviet Union to purchase a minimum of 4 million tons each of wheat and corn between October 1 and September 30 annually through 1988, the Soviets chose to purchase only 2.9 million tons of wheat in the last agreement year. However, the Soviets exceeded their minimum corn purchase commitment, taking 15.8 million tons.

Soviet Deputy Minister of Foreign Trade Melnikov indicated that "the unfulfilled long-term grain agreement for wheat was due to uncompetitive U.S. wheat prices." 1/ The Soviets reportedly argued that U.S. wheat was not competitively priced and that the grain agreement called for the United States to sell the grain at the world market price. 2/ The actual wording of Article I of the U.S.-USSR Grain Agreement follows: "Purchase/sales of commodities under this Agreement will be made at the market price prevailing for these products at the time of purchase/sale and in accordance with normal commercial terms."

Grain Dominates U.S. Agricultural Sales to the Soviets

The United States sold 14.1 million tons of grain to the USSR in 1985, almost 25 percent less than in 1984. Although total Soviet grain imports remained at about 45 million tons, the U.S. share of the Soviet import market declined from about 43 percent to 32 percent. In contrast, Argentina and the EC increased their shares of the Soviet import grain market 3-4 percent.

Grain accounted for 89 percent of the \$1.9 billion in U.S. agricultural goods exported to the Soviet Union. Table 21 reflects the normal pattern of Soviet agricultural purchases from the United States, except for the purchase of soybeans. The last year since 1985 that the Soviets failed to import U.S. soybeans was 1975. Between 1975-84, average Soviet imports of U.S. soybeans exceeded about 575,000 tons annually.

Credit Restrictions Remain on Government Credits

U.S. trade surpluses with the Soviet Union continue in the absence of U.S. Government credits and credit guarantees. The \$550-million loan by the Commodity Credit Corporation to the USSR in the early 1970's was the last long-term credit extension offered to the USSR by the U.S. Government. In 1974, the U.S. Congress passed the Export-Import Bank Amendments and the Trade Act of 1974, which made

1/ U.S. International Trade Commission. 45th Quarterly Report to the Congress and the Trade Policy Committee on Trade Between the United States and the Nonmarket Economy Countries During 1985. USITC No. 1827. Mar. 1986, pp. 45-6.

2/ Ibid.

most-favored-nation (MFN) status conditional on emigration policy and a prerequisite for access to U.S. Government credit facilities. The USSR has yet to be granted MFN status. Private financing, however, is not prohibited, and the Soviets have borrowed to cover some of their grain purchases in recent years. For example, in 1985, a \$400-million credit facility was set up via the joint efforts of a private U.S. bank and a London bank. As a result, the Soviet Foreign Trade Bank (Vneshtorgbank) has the option of drawing funds for 3 years to pay for grain purchased from the United States and Canada. The condition on this credit is that three-quarters of the grain be of U.S. origin. 3/

Outlook for U.S. Trade in 1986

The value of U.S. exports to the Soviet Union is expected to decrease in 1986, primarily because of reduced Soviet need for imported grain. Soviet demand for foreign grain should decline as a result of the estimated 20-million-ton increase in 1985 domestic grain output. First-quarter trade data for calendar year 1986 show that Soviet purchases of U.S. grain are down by more than 66 percent. U.S. soybean sales, however, will be higher than normal, at about 1.5-1.6 million tons. USSR purchases of U.S. agricultural commodities totaled \$456,000 through the first 3 months of 1986, down almost 50 percent from the comparable period of 1985.

With respect to the U.S.-USSR Grain Agreement, which corresponds to the fiscal year, Soviet purchases of corn have already exceeded the minimum corn purchase requirement. However, the Soviets have purchased only 153,000 tons of wheat and will have to purchase another 3.85 million tons by September 30 to avoid violating the minimum purchase requirement for wheat for the second year in a row. (Tom Bickerton, Eastern Europe-USSR Branch)

Outlook for U.S. Agricultural Exports

Issued February, May, August, and December

Annual subscription: \$13 (domestic); \$16.25 (foreign)

The U.S. agricultural trade surplus is expected to shrink further during fiscal year 1986 to \$7.5 billion, its lowest point in 13 years. According to the May issue of USDA's *Outlook for U.S. Agricultural Exports*, farm product exports are forecast at \$27.5 billion, 12 percent below last year's level, while imports are expected to gain marginally to \$20 billion. An update of this forecast will be available in late August. To subscribe to this quarterly publication, send check or money order payable to "Superintendent of Documents" to Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.
